2. Instructions for Camera Ready Paper Submission

While preparing the final camera-ready version of your paper please adhere strictly to the Journal's Format Requirements.

Comments from reviewers:

Review 1

Our decision is: Revisions Required before publishing process
A high quality chapter should has:
(1) a clear statement of the problem the paper is addressing;
(2) the proposed solution(s); and

(3) results achieved. It describes clearly what has been done before on the problem, and what is NEW.

Review 2

The goal of your revision is to describe NOVEL technical results.
Please note that there are four (4) types of technical results:
(1) An algorithm is missing;
(2) A system construct: such as hardware design, software system, protocol, etc.;
(3) A performance evaluation: obtained through analyses, simulation or measurements;
(4) A theory: consisting of a collection of theorems.

Review 3
Your revisions should focus on:
(1) Describing the results in sufficient details to establish their validity;
(2) Identifying the novel aspects of the results, i.e., what new knowledge is reported and what makes it non-obvious;
(3) Identifying the significance of the results: what improvements and impact do they suggest.

Required style file for word can be downloaded from the following link:
